Dear Councilmember Dernoga:

In January, members of the NCPCA Board met with you regarding several issues affecting North College Park. During that meeting, we expressed our frustration at the delay of the Hollywood Streetscape Project exercise trail. Per Terry Schum, College Park's Planning Director, during the review of the City's conceptual plans for the project, M-NCCPC expressed concern about any work commencing in the WSSC easement area near Narragansett Dr. M-NCCPC stated that until there is further information about the age, condition and conveyances of the pipe below the easement area, no work should commence. Please note that there is some question by NCPCA Board Members as to whether the easement actually belongs to WSSC or Prince George's County Department of Public Works.

It is regrettable this portion of the project, which appeared to be straightforward, is now at a halt. NCPCA would appreciate your intervention with the exercise trail which has been heartily supported by the local residents and could be accomplished at a reasonable price on a reasonable timeline. Perhaps the issue could be solved by simply returning to the original plan, which did not traverse the pipe.

For more information about the Hollywood Streetscape, see the link below:
